

Geography:

Review Continents & Oceans (Drill Questions & Geography Song)

Landforms and Bodies of Water, Hills and Mountains, pgs. 40-42

Science:

Review solar system – planets & sun (Drill Questions & Geography Song)

Day & Night – Review rotation of earth and do pgs. 50-52 in Cut & Paste

Add Drill Questions:

How many seasons are there?

There are four seasons – winter, spring, summer and fall.

What is another name for fall?

Another name for fall is autumn.

The Earth Is Always Moving, pgs. 70 – 74 in Science Gr. 2-3.

Art Project and Discussion, pg. 34 of Cut & Paste

Need white drawing paper and brown tempera paint for art project!

Worksheets – pages 35-37 of Cut & Paste

Demonstrate the difference between rotation (causing day & night – 24 hours) and revolution – the earth revolves around the sun, causing the seasons. It takes 365 (& ¼) days for the earth to revolve around the sun.

Add Drill Questions:

How many hours in a day?

There are 24 hours in a day.

How many days in a year?

There are 365 days in a year.

The Four Seasons

Winter, spring, summer, fall—

There are four seasons in all.

Winter, spring, summer, fall—

There are four seasons in all.

In the winter trees are bare.

Snow is falling on the ground. (In many places)

It is frosty; it is cold.

We have to dress in warm clothes.

Springtime's breezy and sometimes rainy.

It is green on ground and trees.

Baby animals are born.

There is new growth all around.

Summer's hot and often sweaty—

Lots of time to go swimming.

School is out and it is playtime;

Sunny days are so much fun.

In the fall, leaves are changing;

They are falling on the ground.

It's a cooler type of weather—

Time for harvest and going to school.
